PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong academic foundation in Artificial Intelligence and Human-Computer Interaction (HCI). Experienced in designing secure local software integrating machine learning models into real world applications. Capable of working in collaborative team environments and combining technical expertise with strong communication and problem solving skills.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, HTML/CSS
- **AI Frameworks:** Transformers.js, **RAG**, LangChain.js, WebAssembly (WASM), Streamlit, Hugging Face
- **Technical Concepts:** Artificial Intelligence, Natural Language Processing (NLP), **Prompt Engineering**, Edge AI, Machine Learning, State Management, IT Fundamentals
- **Software & Tools:** Linux, Git, GitHub, Kaggle

PROJECT EXPERIENCE

ResilientCare.ai | AI Engineer / Full-Stack

<https://github.com/marlyn13-cloud/ResilientCare>

(JavaScript, WebAssembly, Transformers.js, RAG, HTML/CSS, D3.js)

- Engineered a privacy, 100% client-side AI mental wellness companion utilizing **Hugging Face NLP models** (mobilebert, distilbert) via **WebAssembly** to ensure zero data exfiltration and complete user privacy.
- Architected a **Hybrid Conversational Engine** combining **zero-shot intent classification** with a **deterministic state machine** to safely route users based on real-time **sentiment analysis** and **cognitive resistance detection**. This app also features **RAG pipeline** implementation for better response analysis.
- **Integrated Named Entity Recognition** (NER) to dynamically extract and recall user context and built interactive D3.js directed graphs to visualize long-term emotional themes securely from local storage.

Freedom Finance | Full-Stack

<https://github.com/marlyn13-cloud/Freedom-Finance-App>

(JavaScript, HTML/CSS, Transformers.js, LangChain.js)

- **Architected a hybrid processing pipeline**, combining algorithmic paths for precise financial math with natural language AI fallbacks for seamless user queries. Also enables a local AI assistant (Spark AI) that ensures 100% user data privacy.
- **Developed dynamic context-injection logic** with LangChain.js to feed real-time financial states into a model for accurate, conversational budget insights.
- **Built a secure, client-side finance tracker** featuring local storage state management, transaction logging, and interactive data visualization.

Phishing Email Analyzer | Security Software

<https://github.com/marlyn13-cloud/phishing-email-analyzer>

(Python, Machine Learning)

- A machine learning-powered tool designed to efficiently **detect phishing emails**.
- The system also offers a user-friendly GUI for real-time email assessment, making it easy for developers and security teams to integrate and deploy within broader **cybersecurity architectures**.

Cyber Crime AI Detector Dashboard | Machine Learning

<https://github.com/marlyn13-cloud/AiCybercrime>

(Python, Streamlit, Computer Vision, Kaggle)

- This project utilizes machine learning and computer vision to analyze cybersecurity datasets and generate AI-based summaries.
- This program features **automated image captioning** and **summarization** for uploaded images.

WORK EXPERIENCE

Undergraduate Research, MSU – AI Review Quality Analysis

Research Assistant

| May 2025 - August 2025

- Conducted a comparative study on the quality of AI-generated reviews versus human-written reviews across various domains.
- Designed evaluation criteria, collected datasets, and applied **content analysis techniques** to assess clarity, relevance, and authenticity.
- Findings contributed to broader discussions on the **reliability and ethical use of AI** in consumer review platforms.

International Pharmacy, Paterson, NJ

Front Desk Associate

| May 2023 - 2024

- Created a welcoming, inclusive environment for all customers.
- Assisted customers with **conflict resolution skills**.
- Collaborated with staff to organize and execute day-to-day tasks and needs.

EDUCATION

Montclair State University (MSU), Montclair, NJ

Bachelor of Science in Computer Science

| August 2023 - August 2026

- **Languages:** Fluent in Spanish and English

CERTIFICATIONS

- **Artificial Intelligence Fundamentals** — April 2025
- **Information Technology Fundamentals** — May 2024
