PROFESSIONAL SUMMARY

Computer Science undergraduate at Montclair State University with demonstrated expertise in **cybersecurity**, **artificial intelligence**, and **machine learning**. Proven ability to develop AI-driven security solutions and conduct applied research in emerging technologies. Seeking SOC Analyst, Junior Cybersecurity Engineer, or AI Engineering roles to leverage hands-on project experience and technical foundation in threat detection and data intelligence.

EDUCATION

Montclair State University (MSU) — Montclair, NJ (August 2023-August 2026)

Bachelor of Science in Computer Science

Languages: Fluent in Spanish and English

TECHNICAL SKILLS

Programming Languages: Python, HTML/CSS, JavaScript

AI/Machine Learning: Machine Learning, Natural Language Processing (NLP), Computer Vision, Classification Algorithms, Scikit-learn, NLTK, NumPy

Cybersecurity: Threat Detection, Phishing Analysis, Security Monitoring, Risk Assessment, SOC Operations

Tools & Platforms: Git/GitHub, Streamlit, Kaggle, Microsoft Excel, Linux

Data Science: Data Analysis, Model Training, Data Visualization

PROFESSIONAL EXPERIENCE

UNDERGRADUATE RESEARCH ASSISTANT — MSU AI Review Quality Analysis May 2025 – August 2025

- Conducted comparative analysis of AI-generated vs. human-written reviews across multiple domains, assessing clarity, relevance, and authenticity metrics
- Designed evaluation criteria and collected datasets using content analysis methodologies to support research objectives
- Applied findings to contribute to industry discussions on AI reliability and ethical deployment in consumer platforms
- Collaborated with research faculty to document methodology and present findings

FRONT DESK ASSOCIATE — International Pharmacy Paterson, NJ | May 2023 – April 2024

- Provided exceptional customer service while managing administrative tasks and customer inquiries
- Demonstrated strong communication and conflict resolution skills in fast-paced healthcare environment
- Collaborated cross-functionally with pharmacy staff to maintain operational efficiency and customer satisfaction

PROJECTS

AI Phishing Email Detector

Python | Scikit-learn | Machine Learning | Logistic Regression

- Developed supervised machine learning model using Logistic Regression to classify phishing and legitimate emails
- Implemented NLP techniques for email text preprocessing and feature extraction
- Achieved high precision on real-world email datasets through iterative model optimization
- Designed user-friendly interface enabling integration into enterprise cybersecurity workflows

CyberCrime AI Detector Dashboard

Python | Streamlit | Kaggle | Computer Vision | Data Visualization

- Built interactive real-time dashboard analyzing cybersecurity threat datasets with AI-powered summaries
- Integrated computer vision for automated image captioning and intelligent threat categorization
- Implemented data visualization components for actionable threat intelligence insights
- Demonstrated capabilities in SOC-style monitoring and automated threat assessment

CERTIFICATIONS

- **Information Technology Fundamentals** — (May 2025)
- **Artificial Intelligence Fundamentals** — (June 2025)
